An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the specification, on page 7, line 3, "Fig. 3 shows another" has been changed to -- Figs. 3A and 3B show--.

REASONS FOR ALLOWANCE

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance: Prior art fails to teach or fairly suggest a device for controlling fluid comprising at least one storage chamber to which a fluid is injected and stored, at least one reaction chamber in which a predetermined reaction occurs on the fluid, and at least one supply channel. The supply channel communicates with fluid from each storage chamber to the at least one reaction chamber. The device further comprises at least one exhaust chamber in which fluid used as a result of the reaction is exhausted and at least one exhaust channel. The exhaust channel communicates with used fluid from each reaction chamber to the at least one exhaust chamber. The device further comprises a first capillary stop valve located in each supply channel between the at least one storage chamber and the at least one reaction chamber. The device further comprises a second capillary stop valve

located in each exhaust channel between the at least one reaction chamber and the at least one exhaust chamber. The device further comprises at least one side connecting channel connecting the first capillary stop valve to the second stop valve. The capillary stop valves stop the flow of the fluid in each supply channel and exhaust channel using the surface tension of the fluid and wherein a flow of fluid through the side connecting channel opens the capillary stop valves. The device further comprises at least one flow delay part formed within the side connecting channel and delays the flow of the fluid by the surface tension of the fluid and the fluid moves from the storage chamber to the reaction chamber and exhaust chamber by using only surface tension and the fluid in the reaction chamber is replaced by a different fluid.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
